

The Minerva[®] Bacculaureate Program

This transformative 4-year program is available to 9th grade students who want to elevate and accelerate their high school education.

Students who choose Minerva Bacculaureate

- Self-motivated
- Work collaboratively
- Overachieve but feel uninspired in a traditional academic setting
- Like an academic challenge

Caprice Young, Ed.D.,
Superintendent

“I want your kids to have what I’ve given to my own kids, a program tailored exactly to their needs, that supports the achievement of their own goals and dreams. We will help them discover and develop strengths they didn’t know they have.”

With Minerva Bacculaureate, college-prep is college now

Our program condenses high school curriculum into a 3-year track, with the fourth year focused on college-level courses and a capstone project.

Minerva Bacculaureate graduates receive:

High School and Bacculaureate diplomas

At least one year of college credit

Knowledge that will meet the demands of an elite higher education

Why Minerva Bacculaureate?

The strength of the Minerva Bacculaureate approach is its emphasis on improved learning outcomes. Students are introduced to key concepts, then continue to refer back to them in order to build competencies over time until they can transfer what they’ve learned to unique situations. The approach is successful for any kind of student because it’s based on the science of learning. It will prepare them for life after graduation, no matter the context.

Minerva Bacculaureate students can expect:

- Fully active, discussion-based learning (live and daily)
- Multidisciplinary, self-paced coursework
- Data-informed academic guidance
- Calendar and schedule similar to traditional schools
- Complex critical thinking, advanced problem solving, and strategic decision-making across disciplines

“ In Minerva programs, 90% of learners are engaged over 90% of the time. It’s turbocharged engagement: it’s like TRX training for your brain. It’s as engaging and challenging as debate but less artificial. ”

– Forbes, July 2020

✓ Application Requirements:

- **Incoming 9th grade students.** If interested student is another grade level, please contact Admissions.
- **English proficiency,** for international students.

Once admitted, select texts and reading materials will be available for purchase by the student.

Guy Fregault,
Stanza Teacher

“In an online school where the student-to-teacher ratio is high, the work can get repetitious. Assignments are the same. That’s not the case at Stanza. There’s diversity in the content, in the way we deliver instruction, in the platforms we use, and in the countries the students come from.”

Sound interesting?

We think so, too. Talk with our Admissions team to help determine if the Minerva Baccalaureate track is right for your student.

Stanza International Academy. Your new Plan A.

We know all students do not learn the same. For some, online is best. That’s why we exist. We put high-caliber, student-led learning within reach for students grades 6-12. And we are succeeding.

We are Plan A for individualized, purpose-built online education.
